

Chamuditha Gayashan

Artificial Intelligence, Machine Learning

Profile

I'm Chamuditha Gayashan, an AI/ML engineer and researcher specializing in computer vision, deep learning architectures, and intelligent robotic systems. Currently pursuing a research-driven career dedicated to solving complex engineering problems and advancing the frontier of artificial intelligence.

Education

SLTC Research University | 2025 - Present

BSc (Hons) in Data Science

Selected Projects

Pneumonia Detection (CNN)

Python, PyTorch, OpenCV

- A deep convolutional neural network designed to classify inflammatory pulmonary pathologies from digital chest radiographs.

Academic Management System

Java, Spring Boot, MySQL

- An enterprise-patterned management architecture utilizing a normalized relational schema with RBAC.

Skills

- Software Architecture
- Knowledge of algorithms and data structures
- Artificial Intelligence
- Machine Learning
- Deep Learning
- Database Design
- programming languages (python, java)

ADDRESS

Colombo, Sri Lanka
